

BIOENERGY RESOURCE CENTRE

ENERGY EFFICIENCY IMPROVEMENT AND USE OF BIOMASS IN SMEs

**How to reduce energy bills using more efficiently
biomass for heat production ?**

Which sector are you in ?

- Timber transformation (sawmills, joineries)
- Agro industry (fish, fruit and vegetable drying)
 - Rice production (husk)
- Any other activity sector using heat for production

Are you thinking of rationalizing your use
of biomass and heat production technologies ?

The BRC offers

1. TRAINING AND INFORMATON

For

- Bioenergy project development
- responses to specific energy challenges

The BRC also offers

- a professional space for electronic information (documents, syntheses, case studies,...)
- a monthly electronic newsletter
- thematic fact sheets on case studies
- training and knowledge levelling of research centres, energy counsellors

TECHNICAL ASSISTANCE FOR PROJECT DESIGN AND DEVELOPMENT

With your bioenergy project idea, the BRC offers :

- advice, expertise, services on the energy challenges of your company
- the technical, economical and institutional implementation of bioenergy projects
- the appropriate technologies at competitive prices

THE PROFESSIONALIZATION OF VARIOUS ACTORS

Through

- a typology of bioenergy professions
- a directory and roster of professionals (research centers, equipment manufacturers/sellers,...)

THE PROMOTION OF TECHNOLOGIES

Organisation / Participation in such events as open days , fora, workshop

- Communication on bioenergy
- Bringing together bioenergy professionals (federations, networks, etc.)
- Revivifying the bioenergy sector (access to the public)
